

## ***GSFC Interim Solution for uploading Consumption data for standard rate assessments***

Demand based Carrier Account operating costs are assessed to the various benefiting programs based on actual consumption. Goddard Space Flight Center plans on utilizing actual civil servant and contractor hours, contractor costs, and other direct costs by project WBS element as consumption data for standard rate assessments.

An automated upload program already exists to facilitate Phasing Plan data conversion. This program accesses transaction code CJR2 and uses planning profile ZPLAN to add phasing plans based on data in a predefined excel spreadsheet template. We have reviewed this process in SAP and feel that it will also accommodate our requirement for uploading actual labor hours as consumption data for standard rate assessments. Only the **data** in the spreadsheet will change.

This user procedure script outlines this consumption data upload process.

1. The consumption data for the pools will be extracted by project WBS element from the legacy chargeback systems in the following format:

### Input file layout

PLPROF(8),	"Planner Profile
VERSN(3),	"version
FPERIOD(3),	"period from
TPERIOD(3),	"period to
GJAHR(4),	"fiscal year
POSID(24),	"WBS element
GEGER(10),	"fund
KSTAR(10),	"cost element
FKBER(4),	"functional area
KSTAR2(10),	"cost element
SPRED(4),	"distribution key
WKG1(15),	"Overview fixed costs
PERBL(3),	"period
WKG2(15),	"Periodic fixed costs

It is critical that the input file conforms to the above layout column widths. The ABAP program will not be able to read this input file if it doesn't match the layout.

Once he's finished, the programmer will send a copy of this file to the Cost Pool Resource Analyst via email.

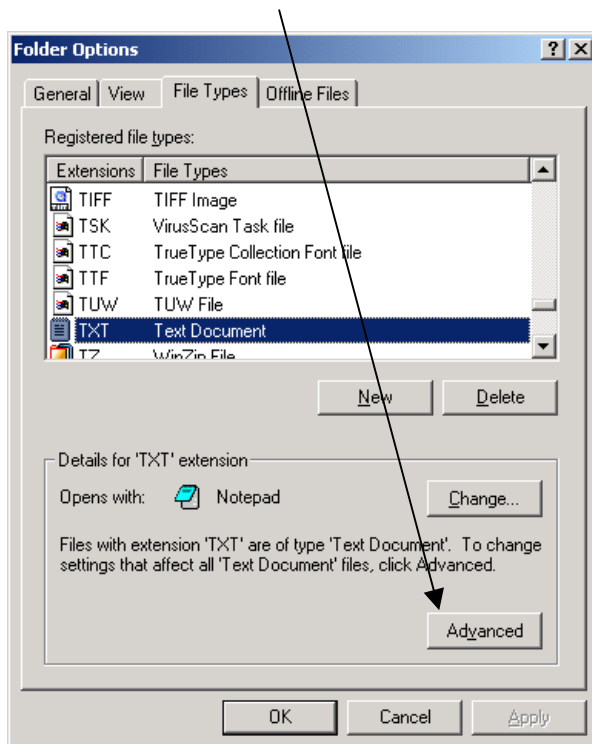

Save this input file to the C:/ folder on your desktop. The upload program will need to find/access this file during its' execution.

2. Ensure that the Folder Options are set correctly on your workstation before attempting to upload. (Once you make this change on your workstation, you will not have to do it again unless you use a different workstation for your upload)

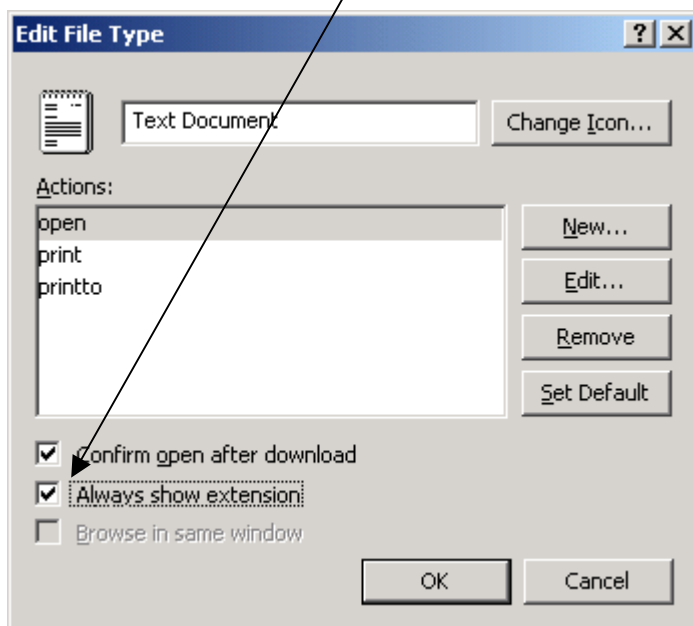

Go to the My Computer Icon on your desktop  
Go to Tools -> Folder Options

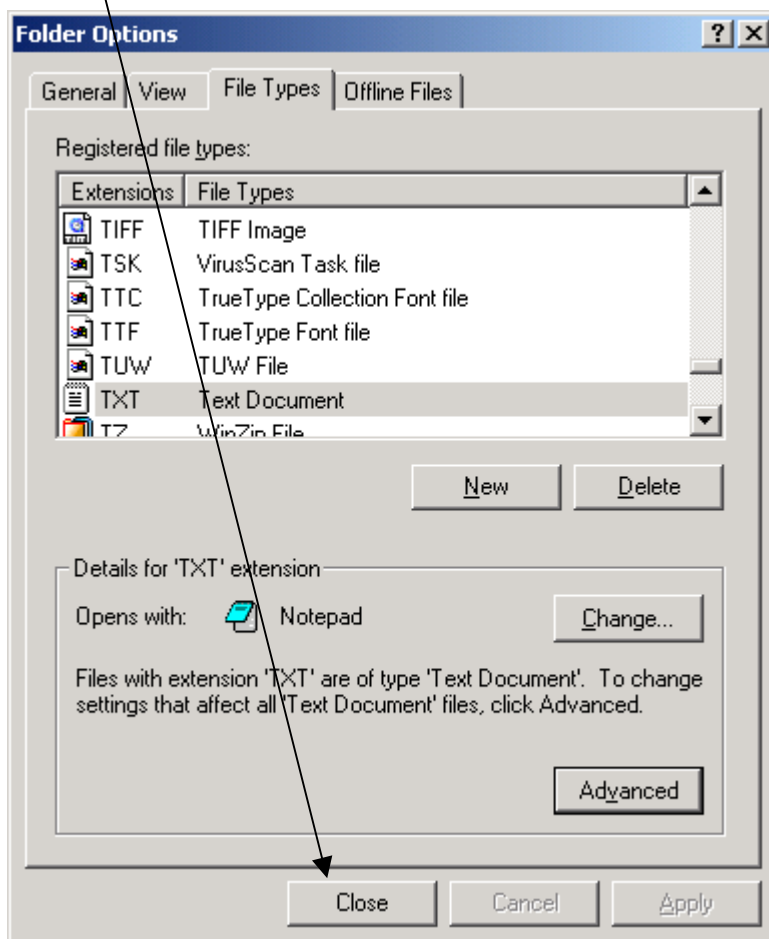

Select the File Types Tab  
Under Registered File Types, select the TXT extension  
Click the Advanced button

Check "Always show extension"  
Select OK  
Select Close

Select Close

3. **Upload your txt file:** Use transaction code ZCCO\_WBS\_PLAN to run the automated upload program.

CCO-007 Cost Element Plan screen

- a. Inbound PC File: Enter Path, File Name and File extension of input file that you saved to your desktop.
- b. Outbound PC File: Rename C:/Outbound\_File.txt
- c. Archive: Z\_FI\_CCO011F\_GSFC\_INPUT\_PROJECTS
- d. BDC Session: 51\_XXXX\_POOL (XXXX = Pool name: TEST, FABR, PAS, CORT, QSS, SWAL, MPS)
- e. Check the box Go directly to SM35
- f. Click Execute.

The screenshot shows the SAP CCO-007 Cost Element Plan screen. The title bar indicates the program is 'ZCCO\_WBS\_PLAN' and the user is 'ifmpdev' in the 'INS' role. The main area contains several input fields and a checkbox:

- Please Enter Path, FileName, and File Extension When Selecting PC Radiobutton.**
  - Inbound PC File: C:/TIMIS\_SAP\_Interface.txt
  - Outbound PC File: C:/OUTBOUND\_FILE.txt
- Please Enter Logical File Names**
  - Archive: Z\_FI\_CCO011F\_GSFC\_INPUT\_PROJECTS
- BDC Session**
  - 51\_TEST\_POOL
- ☒ Go Directly to SM35

The bottom status bar shows the transaction code 'ZCCO\_WBS\_PLAN', the user 'ifmpdev', and the role 'INS'.

4. Use transaction code SM35 to process your BDC session 51\_XXXX\_POOL. Note: you automatically accessed this screen because you checked the Go directly to SM35 box while executing the ABAP program.

Notice that the session status for BDC 51\_XXXX\_POOL is New. We'll need to process this session in order to complete our consumption data load into SAP's CJR2 planning screens.

Batch Input: Session Overview screen

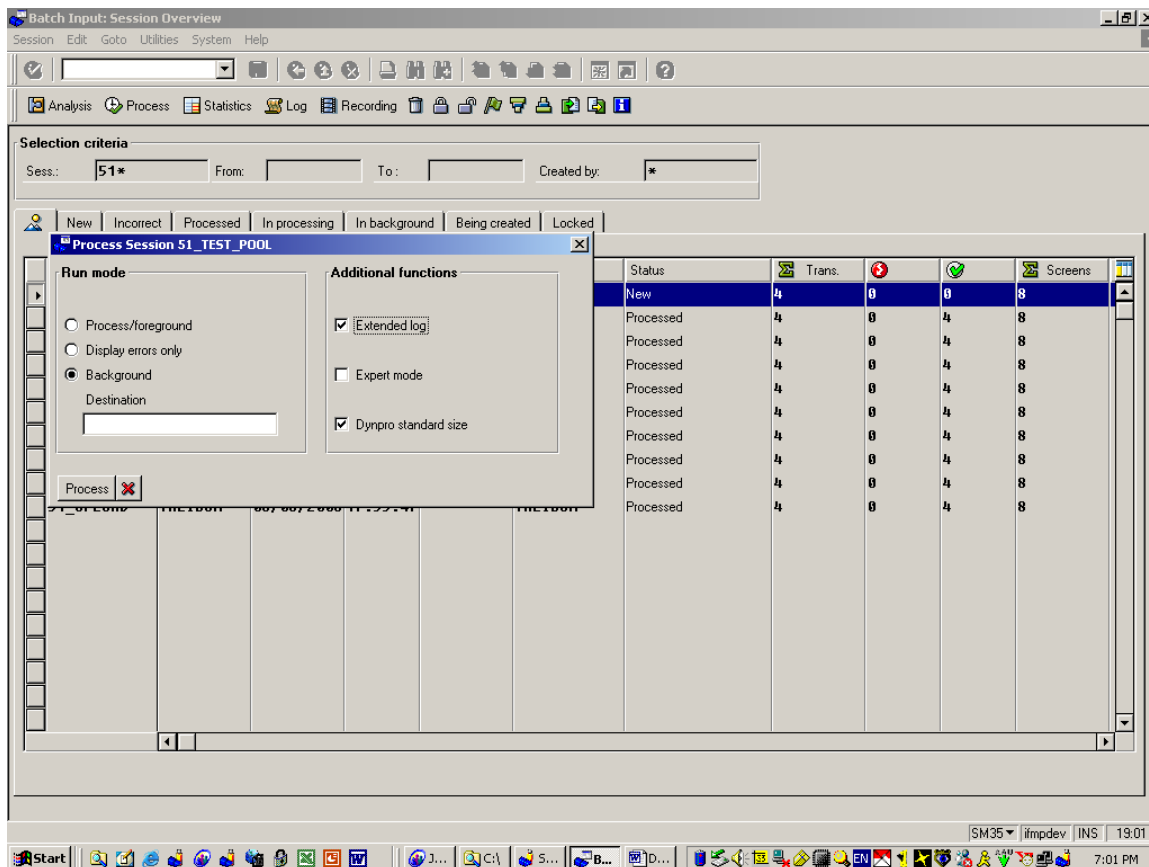

- a. Select BDC session 51\_XXXX\_POOL by clicking on the box at the left side of that row.
- b. Click Process Session (clock face with green check) button.

## Process Session 51\_XXXX\_POOL pop-up box

- c. Select Run mode: Background
- d. Check Extended log
- e. Verify Dynpro standard size is checked.
- f. Click Process button.

Message: 1 session(s) transferred to background processing

- g. Click Back (green arrow pointed left) icon to exit processing.

- h. Periodically check BDC session via transaction code SM35 until status has changed to either Processed or Errors.

Once again, you'll notice that transaction CJR2 has been processed successfully ... multiple times, once for every row in your input file.

5. Now, let's review the results of your BDC processing in SAP. Use transaction code CJR2 to see the actual consumption data loaded in SAP.

Information pop-up box

- a. Click Enter (green check) icon.

Set Planner Profile pop-up box

- b. Planner profile: ZPLAN
- c. Click Enter (green check) icon.

Enter specific selection criteria related to one of the consumption data rows from your input file.

Planning Cost Elements/Activity Inputs Change: Initial Screen

- d. Version: 98
- e. Period: From Period for which consumption data was entered.
- f. Period: To Period for which consumption data was entered.
- g. Fiscal year: Fiscal year for which consumption data was entered.
- h. WBS Element: Project WBS for which consumption data was entered.
- i. Cost Element: Planning cost element on which consumption data was entered.

Note: this planning cost element represents the carrier account/cost pool that this consumption data will be used for.

As an example, TEST.HOUR1 is used for loading Test hours related to the Rate Code 1 for the Test Pool.

- j. Fund: Fund source/ Program year Fund for which consumption data was entered.
- k. Functional area: Functional area for which consumption data was entered.

Remember, all of these selection criteria were part of the data record in your input file.

This screen presents the overall plan for the periods that you entered. You can also view a by period plan.

- m. Select overall plan by clicking on the box at the left side of that row.
- n. Click on Period screen Overview (upwards graph line over chart) icon.
